

A NEW MOBILE APP DESIGNED FOR FIRST RESPONDERS

This FREE, "IMMEDIATE RESPONSE" app was designed just for First Responders. It is their '911' direct connect when they need help. With just a few clicks, First Responders are speaking or texting with a peer to get them immediate help for their concern.

Now, through a strategic partnership with usarehabcenters.org, they can easily find local resources for help as well. The strength of this application is a result of First Responder 911 Foundation partnering with ATT FirstNet to securely connect with local crisis lines and the national 988 lifeline. Every call from our First Responders is answered by competent fellow responders. They are educated, trained and certified to be on the other end of you call for behavioral and mental health issues, 24/7/365. First Responder 911 Foundation is committed to the health and well-being of our police, fire, emergency medical staff and all emergency personnel that are here for us, **every hour of every day.**
